

# Reach for the sun ...

## LATEST FROM ALLARD GOLDE

Introducing the New Slim Fitting Golde Continental Sun Roof which is being shown at the 1972 Earls Court Motor Show, and will be available shortly.

The frame incorporated in this roof is slimmer in construction and replaces the present type. This results in better headroom.

A new type of draught deflector will be available as an optional extra.

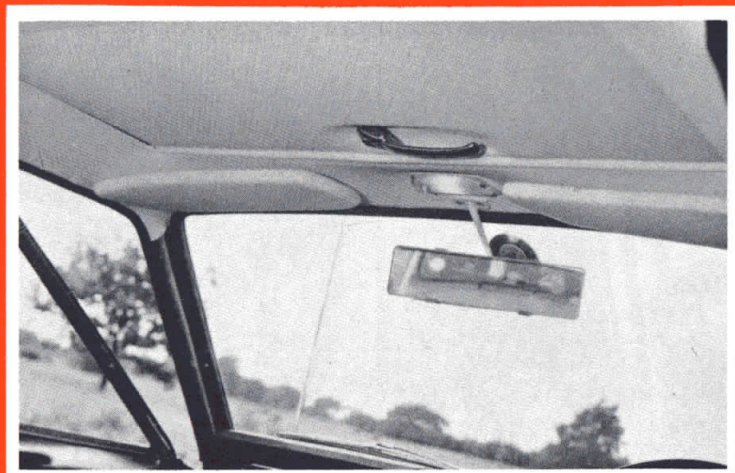

## ... with a **GOLDE** continental sun roof ...

The Golde roof transforms your car into a real convertible. Note how the new safety draught deflector,\* included in the remarkably low price, folds away when the roof is closed.

\*Patent applied for

Note also the padded area of headlining above the front seats and around the recessed handle.

Now you can enjoy the sunshine and fresh air of summer motoring and touring abroad without sacrificing any of the year-round comfort of your saloon car. A **Golde Continental Sun Roof** opens from the driving seat, locks in any position, and includes the ingenious patented perspex draught deflector. And just as easily and quickly the **Golde** closes to give you the completely weather-proof saloon you had before. It's guaranteed for 12 months too.

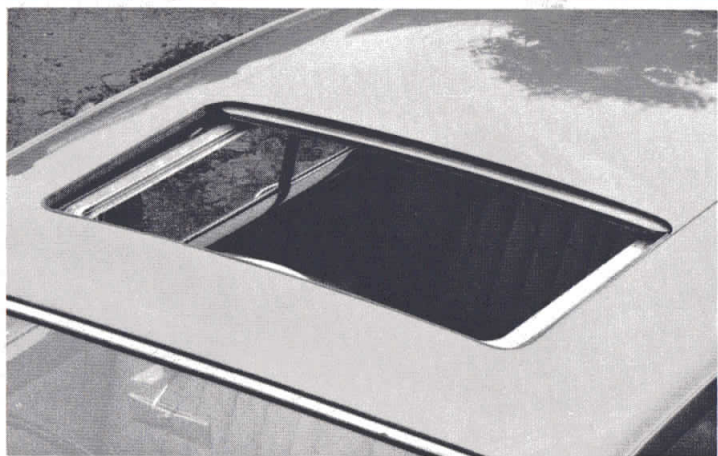

A **Golde Continental Sun Roof** is fitted with the greatest care and craftsmanship, and entails the following sequence of operations.

1. Headlining, seats and carpets are removed.
2. A strong, seasoned ash frame is secured under the roof panel by floor jacks holding the panel under tension.
3. Roof aperture is carefully marked and the section skilfully removed – the panel aperture edges being turned down over the ash frame.
4. Reinforcing brackets are bolted to all corners of the frame. Steel transverse roll bars are bolted through the front and rear ash frame members and welded at each end to the body sub frame.
5. Polished alloy runners and finishing rails are fitted. P.V.C. external top available in a range of colours – is positioned. After each operation work is checked and re-checked for accuracy, strength and ease of operation. Interior is then re-trimmed and the car is fully tested for water-tightness. Car is then cleaned and ready for collection.

The **Golde** enhances the appearance of any saloon car. Weather-proof top comes in many colours to tone with existing paintwork. Matching headlining to most British and Foreign cars.

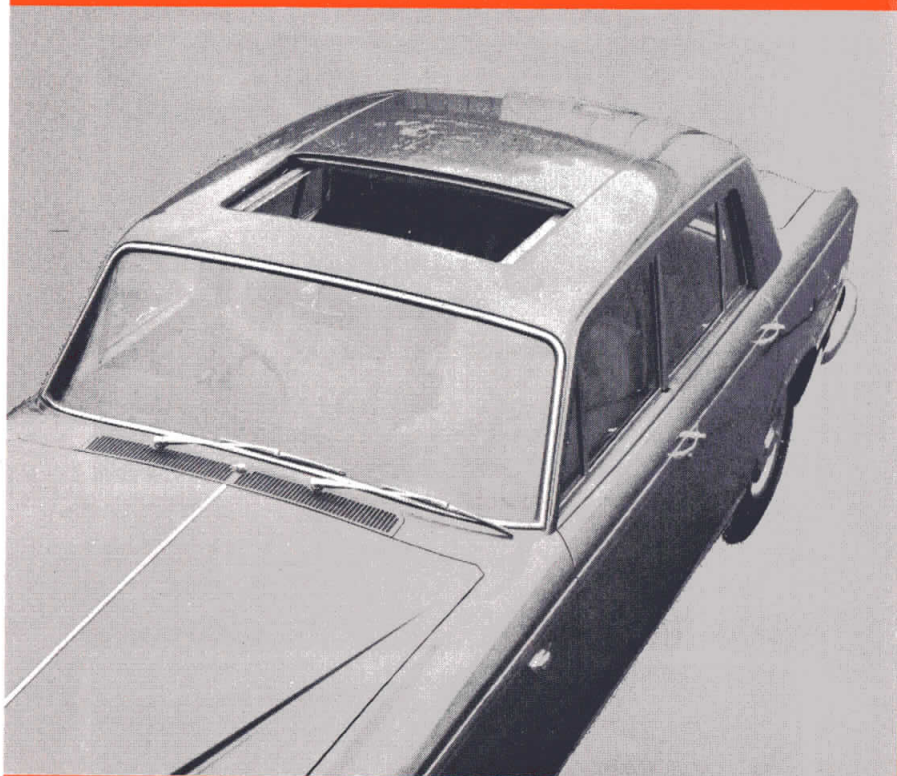

Steel roof fully open. Can be opened to any intermediate position.

Steel roof in closed position.

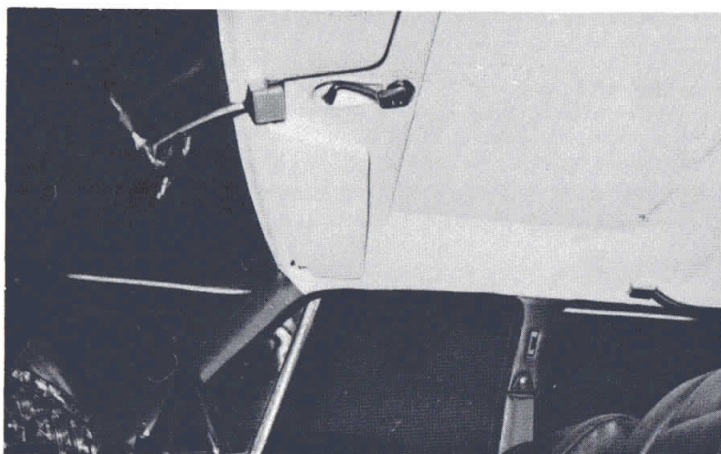

... or with a **GOLDE steel  
sliding roof**

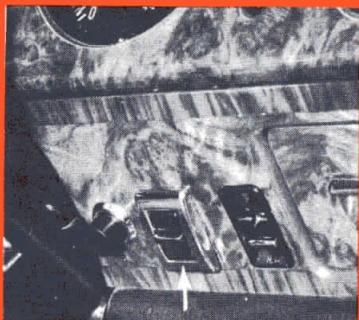

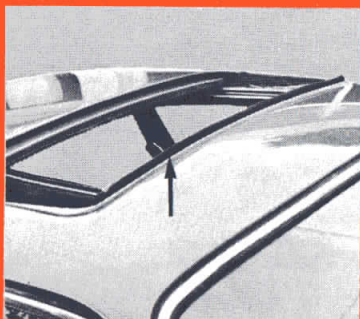

The Golde steel sliding panel roof is also available. The view upwards and the open air effect heighten driving comfort and help to overcome driving fatigue.

The manually operated roof can be opened or closed in any position and the handle tucks neatly away.

The electrically operated roof can be set at any aperture by pressing the button on the fascia panel. ►

◄ Draught deflector supplied with all models. Stays firmly mounted in the car and moves automatically outward or inward when the sliding roof is opened or closed.
